

# Fiberglass Fabricators, Inc.

## Composi-Cover™

An all composite flat cover system

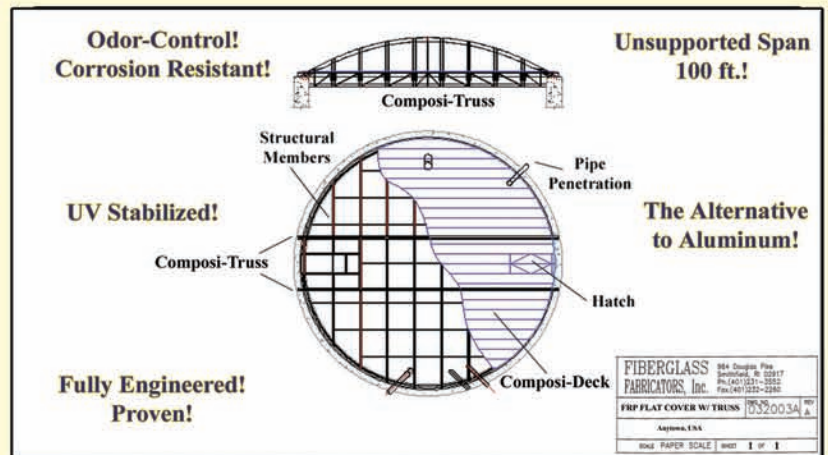

### Features:

- Corrosion resistant
- Maintenance Free
- Lightweight
- Cost Effective
- Durable, Rugged
- Easy to Install
- UV Resistant
- Design Flexibility
- Meets ASCE Loading Conditions

## Composi-Truss™

Fully engineered Composi-Cover utilizing a truss arch support system

### Technical Data:

Covers are designed using the combination of pultruded products (structural shapes) in conjunction with hand lay-up (open-molding) to provide maximum design flexibility.

With the use of computer-aided design, composite laminate theory methods and finite element analysis, FFI produces the most technologically sound and durable advanced composite components that meet or exceed the industry standards.
